

Topology Check (machine license)	160,00
with dongle license additionally)	70,00

All prices in EUR and plus VAT.

Licensing

1. Determine the computer ID.
The easiest way to do this is to simply start TopologyCheckerUI. The computer ID is in the upper right corner and can be copied out here easily.

Important when using in a network: please create the Machine-ID if there are no "temporary network adapters", e.g. no VPN, but only the ones that are always there!

2. Specify when ordering the license
 - the computer ID
3. You will receive a file, which you can activate with the button "Install license".

If the topology check has not been licensed, it will run in demo mode with the following restrictions:

- Only a total of 5 addresses can be scanned.
