

Release Notes for Project Diff 5.0.1436

1 General information

Please check for new App versions!

1.1 Operating systems

All Windows operating systems allowed for ETS Professional are supported.

1.2 Installation

You need ETS5 Professional version 5.7.2 or higher.

2 Important changes since previous releases

2.1 Changes since version 4.0.1247

- FIX: Bugfix for devices with bus interface
- FIX: Hint about MAP parameters and objects that are not (yet) comparable

2.2 Changes since version 4.0.1217

- FIX: List newly inserted or deleted group addresses: Group addresses below a newly inserted group address range (middle group) were not explicitly listed up to now. This is now possible via an option.
Applies analogously to deleted group addresses after deleting a group address range.
- FIX: Newly added lines below a newly added area are listed, also deleted lines when deleting an area

2.3 Changes since version 4.0.829

- ADD: For properties that might contain formatted text (e.g. Comments), distinguish between text changes and formatting changes.
- FIX: When comparing with an unrelated project or an ETS4 knxproj, a project part containing rooms with the same name and number produces an error message and prevented the comparison. This situation is now instead displayed as a room with yellow question mark in the difference list.
- FIX: The options were sometime not applied correctly.
- ADD: IP Parameters are now also compared.
- ADD: Compare data of last download.
- FIX: Adapted to ETS 5.7
- FIX: Standard parameters were not always compared correctly.
